

## AIRACOBRA

From the start of the Second World War, aircrafts were crucial to the success of army operations, supporting troops from the sky. The Airacobra was one of the best fighters of its time, with especially effective ground attack capabilities, making it a valuable addition to the infantry. During the Second World War, pilots began receiving watches as part of the indispensable equipment for their missions. The Airacobra watch collection demonstrates the inseparable link between aviation and watches.
