

MIG-29
SMT

The watch model has an unusual story behind its creation. It was there, inside the MIG-29's cockpit, that the first draft of this watch was developed. The design of the case and dial was barely modified, but based on the MIG-29's cockpit clock instrument. Like the MIG-29 fighter is furnished for multirole use, the timepiece has multiple functions such as chronograph aeronautical slide rule.

MIG-29 /// SMT CHRONO

MOVEMENT

- Quartz, Ronda 5030.D.

FUNCTION

- Hours, minutes, small second, date
- Chronograph, center stop second, hours counter, minutes counter
